

ECO-AGRIC UGANDA SUSTAINABLE GARDENING DEMONSTRATION SITE

Eco-Agric Uganda agricultural demonstration site aims at promoting Eco-tourism and sustainable agriculture production. It makes use of a combination of agro-ecology and eco-tourism. It is based on agricultural production and focuses on tourism management. Its services are a combination of tourism and agriculture. It grows crops for tourism purposes first and then sold off to earn income for both local and international people.

It integrates agriculture with tourism involving winery tours, rural bed and breakfast, Life of an everyday farmer, visiting fruits and vegetable farms, floriculture among any other things that concern agriculture.

Eco-Agric Uganda demonstration farm is located in Hoima district three kilometers from Hoima central market, just behind Eco-Agric Uganda market. The demonstration farm was set up and is owned by Environmental Conservation and Agricultural Enhancement Uganda (Eco-Agric Uganda). This is a Community member based Non Governmental Organisation established 2007 and registered with the Government of Uganda in 2010.

It is an integrated farm that deals in different agricultural practices. The farm also shows people on how to exploit the environment without damaging it for future use and shares the modern farming techniques, share information with the locals about integrated farming and so much
